AI Startup Incubator

About Us

AI Startup Incubator is an AI-focused Incubator based in Prague (Czech Republic). We continuously seek artificial intelligence Startups (at different stages of maturity) and help them growing their business (also with Fundraising). We focus not only on improving the product, develop the team and company traction but we also enable the next-stage fundraising. We provide a unique partnership approach, AI tech. specialized resources and international networking. Our 12 months incubation programme is always available and starts only when investors (Partners or not) commit to invest in a specific Startup during the fundraise we organize.

Why Us?

- Worldwide scouting & strict 3 phases evaluation;
- Fundraising with Investors/Partners;
- Strong pool of Investors, Mentors & Partners;
- Tech & Business support within 12 months incubation;
- Financial & Project management, de-risk strategy;
- We are a partner not a service provider!

About Us

We are the world's most active early-stage investor and backing the most driven founders, from day zero to greatness. Founded on the belief that people innovating is the key to building a better future, we partner with people across six continents to launch and scale high-potential startups that address meaningful opportunities and challenges.

Why Us?

- Global community of builders, investors, operators, experts, and partner organizations
- Long-term partner providing advice, introductions, resources
- People first - always!

Modern technologies emerge in Northern Poland

More and more ground-breaking projects are being developed in Northern Poland. A thriving economy of Gdansk Agglomeration attract modern industry giants.

Invest in Pomerania supports foreign direct investment projects in Northern Poland. We are committed to empowering businesses by providing comprehensive support and unlocking limitless opportunities for investment and innovation. Through strategic partnerships and a investor-centric approach, we aim to create a flourishing ecosystem that fosters success, creates sustainable jobs, and drives technological advancements. Our passion for progress and dedication to excellence propel us to be a trusted bridge that connects businesses to the vast potential of Pomerania, shaping a brighter future for all.

Technology hub

The Tricity (Gdansk-Gdynia-Sopot Agglomeration) is a technology hub, attracting a wide range of companies specialising in IT sector and using artificial intelligence solutions. The wealthy environment provides ideal conditions for the creation and development of start-ups, while the presence of big brands (such as Intel, Amazon or Boeing) helps accelerate the efforts of small companies.

Business support

Pomeranian universities have research centres that support the development of start-ups from the idea stage. Excento at Gdansk University of Technology supports young entrepreneurs in assessing the business potential of a project, choosing the optimal scenario and commercialisation model. It also provides professional legal and administrative support when negotiating and concluding contracts. The Technology Transfer Centre

at the University of Gdansk operates on similar principles. This unit links science with the economy by commercialising the results of scientific research and development work. The TTC also searches for investors and organises meetings between people from the scientific community and business representatives. Pomeranian universities have a modern scientific and research infrastructure, which they are constantly developing. Start-ups can count on comprehensive support from the Gdansk Business Incubator STARTER, the Gdansk Science and Technology Park and the Pomeranian Science and Technology Park. The offer includes specialist consulting, mentoring and training for people planning to start their own business, as well as support for start-ups already operating, for example in the form of preferential lease terms for office space.

QSD (Quality Software Development)

About Us

QSD is a software development house with 30+ engineers on the team. We're a cost-effective software development partner with extensive experience solving business problems through full-cycle product development. Since we have been working with startups for 10+ years, our team possesses a startup mindset and understanding of every stage in company and product development.

Why Us?

- Experienced with startups of all sizes
- Creation of MVPs
- Mobile and Web development
- Biggest focus on quality
- Long-term vision and commitment
